Our Brands

Diamond Sea Glaze

Diamond Sea Glaze custom fabricates windows, doors, hatches and specialty glass products for non-regulatory and light duty commercial application with proven quality and cost effectiveness. Today, Diamond Sea Glaze is part of AdvanTec Global Innovations, a group of companies concentrating on the world-wide marine market. Diamond Sea Glaze along with sister companies, Pacific Coast Marine, Steelhead Marine, and Freeman Marine Equipment share their resources while concentrating on their core businesses.

Why Choose Diamond Sea Glaze?

- ✓ Diamond Sea Glaze provides cost effective marine doors, windows, and hatches with exceptional quality for non-regulatory and light commercial use
- ✓ We provide you with a commitment to respond to your inquiries within 24 hours whether it's for a part, instructions or just a question
- ✓ Located in Langley, BC, Canada, Diamond Sea Glaze offers a new, purpose-built production facility which has extended our product range and capacity
- ✓ ISO 9001:2008 REGISTERED firm with an 80,000ft² integrated fabrication facility operated following lean manufacturing techniques
- ✓ Through our parent company, AdvanTec Global Innovations, we provide a comprehensive variety of partners and working relationships with the industry which exponentially grows value to the nature of our business relationship

With over 100 years of combined business knowledge, AdvanTec Global Innovations focuses on combining engineering capability, manufacturing experience and exceptional customer service with the goal of delivering a broad range of time-tested and innovative product solutions to the world-wide market.

You need exceptional quality marine doors, windows, and hatches to fit your budget and last through generations for light duty and recreational vessels.

Windows

D Series

The D series windows are durable, cost efficient aluminum framed windows. All frames are available with 1/4" glass while the D5 fixed window can accommodate either 1/4" (D5) or 3/8" glass (D5/10). All D series windows are available with mitred corners or with a 2-1/2", 3" or 3-1/2" corner radii. All closures are custom built to your specifications with either an anodized or painted finish.

106 Series

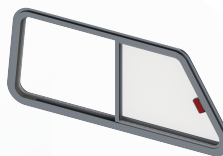

Made from 6000 series aluminum these rugged windows will stand up to the toughest elements for years to come. Offered in a variety of configurations, the 106 frames are designed to accommodate glass up to 1/2" in thickness while the 400 frames can accept glass (sealed units or single pane) up to 3/4" thick. All frames are available with mitred corners or 3" radius corners. Finish options include anodized aluminum or a choice from our selection of powder coat colors. Available in fixed, horizontal sliding and top hinged configurations.
